I have...

a six sided polygon.

I have...

an octagon.

I have...

Who has...

a polygon with eight
sides?

Who has...

the picture of the
hexagon?

Who has...

a polygon with five
sides?

I have...

I have...

I have...

pentagon.

an eight sided figure.

Who has...

Who has...

Who has...

the definition of an octagon?

the picture of the rectangle?

a polygon with four sides?

I have...

I have...

I have...

a quadrilateral.

a rectangle.

a three sided polygon.

Who has...

Who has...

Who has...

a polygon with four side and four right angles?

the definition of a triangle?

the picture of the square?

I have...

I have...

a four sided polygon.

I have...

a triangle.

Who has...

the definition of a quadrilateral?

Who has...

a polygon with three sides?

Who has...

the picture of the circle?

I have...

I have...

I have...

Who has...

the picture of the trapezoid?

Who has...

the picture of a triangle?

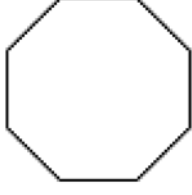

Who has...

a polygon with a set of points equidistance from the center?

I have...
a circle.

I have...
a square.

I have...

Who has...
a polygon with four
right angles and four
equal sides?

Who has...
the picture of the
octagon?

Who has...
a polygon with four
sides and one set of
parallel lines?

I have...
a trapezoid.

I have...
a four sided polygon
with four equal sides.

I have...
a hexagon.

Who has...
the definition of a
square?

Who has...
a polygon with six
sides?

Who has...
the definition of a
rectangle?

I have...
a four sided polygon
with four right ...

Who has...
the picture of the
pentagon?
